

QUALITY POLICY

Caterers Choice Ltd. was established in March 1988 by Brian Pinder, Chairman. With a turnover in excess of £48 million, Caterers Choice globally sources and distributes commodities such as canned fish, canned fruit, canned vegetables, canned pulses and dry ingredients. The product is packed under the own brand label of "Caterers Pride", or alternatively under the customer's own brand label.

Caterers Choice acts as a mediator between the product and the end customer, all quality products are sourced from premium accredited factories with approved HACCP systems. This enables us to ensure all necessary safety and quality controls are implemented, and are fully accessible to Caterers Choice and its customers.

We aim to meet and exceed the customer's commercial and quality requirements, using our exceptional trading experience and technical expertise to ensure our obligations under current legislation for food safety are met.

In order to compliment the procedures of our manufacturing partners, Caterers Choice has an established Quality System to ensure product safety and quality is maintained throughout the supply chain.

Charles Pinder
